

## *Contents :*

Active LeZi:Spatio-Temporal Algorithm for Enhanced Senior In-Home Care System	01-12
The study of reaction of 1,2-dichlorobenzene with ozone	13-24
Crustal structure of Loum-Minta region derived from satellite gravity data and its tectonic implications	25-35
Comparative Analysis of Alkaline Pretreatment Methods for Levulinic Acid Production from Oil Palm Biomass Waste	36-48
Analysis of the Influence of Viscosity and Coating Thickness on Corrosion rate of steel Pipelines coated with produced metallic paints	49-52
A Conceptual Roadmap of Semantic Web based Support System for Self-learning of Science	53-56
Human Interfaced Manipulated Robot Using Accelerometer	57-61
Erosion Control Blankets made of Rice Straw-An Experimental Study	62-64
Compression Ratio Analysis of Bio Fuel Using Pongamiapinnata of CI Engine	65-72
Dynamic Wear Study of a Flow in an Open Channel	73-78
A Personalized Assistance Robot for Individual Care	79-84
Competencies on advancement in New Manufacturing-An Empirical Study	85-90
A study on Power Generation in India from Biomass without wood	91-95
Design of an Autonomous Wheelchair with Voice Recognition Utilizing a Microcontroller	96-99
Impact of Mixing Methyl Ester from Jatropha Oil with Diesel and Conventional Diesel-An Experimental Analysis	100-106
Vibrational Analysis of Engine Camshaft Using FEM	107-111
